Mr. and Mrs. Onni Salonen had a housewarming, so called, to celebrate the opening of their house on Water Street, which has undergone extensive repairs. A few invited guests gathered there, Wednesday evening to extend congratulations and enjoy cards and music. Refreshments were served. Those present besides the host and hostess were Tina Cummings, Arthur Kelloker, Saimi Piirainen, Katie Kahkonen, Toini Cummings, Carl Perry, Mrs. Carl O. Perry, Hilda Komulainen, Toivo Piirainen.

Taken at our word: A man and woman, evidently strangers in town, after carefully reading the sign "Buy or Borrow a Copy" painted on the building, mustered courage to call. The female came in and the male watched outside. She timidly asked for a copy of the paper. Took it, bowed awkwardly, and joined the waiting man. They opened the paper, glanced at it casually, and crossed the street. No one seems to know from whence they came or where they went. They were welcome to the paper, anyhow. We believe in doing as we advertise.

WHY BUILD A DAM?

Would it not be better for the appearance of the village if, instead of filling the Cummings Pond to make a sunken garden with a nice brook running through, having natural conditions on each side of the water, with shrubs and flowers on either side, between brook and walls? This would do away with a body of water that would chiefly breed mosquitoes, of which we have plenty. If this were to be done, I do not see as there is any cause for anyone to object. The flow of water would not be hindered, so there would be no reason to ask permission of anyone but abuttors—who, it is understood, are financing the change. I doubt if there is anyone here but would rather have the garden than the pond. It would at any rate, stop using the place for a dump. —William C. Leavitt.

Seriously Ill

Alpheus Jackson, Norway, made good with the pig raising project. With two brood sows, he received a labor income of $75.46. Along with this project he had two heifers and two acres of oats, which altogether gave him a labor income of $112 for 84 hours work.

Lewis Knightly, Norway, went into raising potatoes, securing a labor income of $51.55 from one-third acre. His hours were 54.

A woman can have as many guests as she will purchase tickets for. THUNDEROUS NOISES

The writer was glad to read the Editor's little note forewarning us about the "thundering motor boats" that are to take possession of our beautiful lake this summer. If last summer was a sample of the thunder of one boat, heaven help us when the one becomes two or more, for surely two pigs squealing under a fence can make more noise than one.

Leaving jokes aside, cannot something be done to lessen the thunder? There is a law that "cut outs" should be closed. Can't it be applied to motor boats? The writer does not know the anatomy or the construction of boats, so she does not know what to call the thunderous noise that reverberates over and around the hills for miles. Is the thunder necessary for the speed of the boat? If so, we must suffer and endure, for this is the age of speed. Nothing else matters.

—Elva Dorr.

Note: It is understood that all power boats will be equipped with under-water cut-outs, this year, thus eliminating the "thunderous noises" as referred to above.—Editor.

Oxford County feels that this district is entitled to a representative and prominent leaders in other towns in position to know things, are behind the local movement to nominate and elect Mr. Partridge, should he accept.

There is an attempt being made to form a league for the girls' basket ball teams of the county. This would assure each team of a definite number of games and the chance of incomplete schedules would be lessened. Several of the surrounding towns have been asked to cooperate with this idea and so far the principals of the following schools have shown approval of the plan: Norway, Bridgton Academy, South Paris, Mechanic Falls and Oxford. There are two more schools to hear from, an aggregate of seven schools, should their reply be favorable. This idea has been worked out for boys' games for some time and several girls' teams have been successful in the idea.

SOMETHING ABOUT "DAN" SANBORN

Eugene B. Lane, 285 School St., Berlin, N. H., writes as follows: "Was much interested in the article by E. H. Wilcomb, think the "Dan" Sanborn he speaks of afterwards became General Superintendent of the Boston & Maine R. R., and I have good reason to remember him, for being called on the carpet in my early railroad days, by his order. And the wording of some of his orders, in the Discipline line, how in describing some violation of rules by a delinquent he would add "Let this be a lasting lesson to you all" or "A word to the wise is sufficient." Those Red Bulletins of his were salutary in making the railroad men sidestep his bunches of black marks, which was often handed out."

SOUTH PARIS NEWS

The Walker Field Day

A good dinner, followed by a well balanced program and many sales were some of the high spots at the twenty-third annual field day of A. W. Walker & Son, under the supervision of George L. Skinner, general manager.

Crowds gathered early and inspected the extensive line of modern farming implements, International trucks, pressure tank outfits and a score of other mechanical devices to lighten labor and increase production in fields, gardens and orchards. Robert Wise looked after this department.

A dozen and more representatives from the International Harvester Co. and other concerns demonstrated the latest implements and answered many questions along their lines. While there were many attracted by the excellent dinner, the majority appeared for business with the result that numerous sales were made and a good list of prospects secured.

The grounds gave the appearance of County Fair time, with not less than 700 men, women and children on the premises. There were according to actual count, 168 automobiles and twelve carriages. Edward H. Brown, instructor of Agriculture at Norway High School and his class were guests. Note books played an important part during their tour of observation and the findings will appear later during class room work.

The dinner hour at noon was a scramble for seats at long tables in the Burnham & Morrill Co. packing room. In this important event the Burnham & Morrill Co. co-operates each year and provide something like 125 cans of their famous baked beans and brown bread, twenty-five pounds of cheese, milk, crackers and perhaps twenty-five gallons of coffee. Camp style prevailed. Corn boxes for seats, tin dippers and pulp plates at every place with everything set on for easy picking. The food tasted good and disappeared when the hungry ones went into action.

A corp of helpers set the tables, poured coffee and replenished the food. Mrs. Bessie Goldsmith was assisted by Mrs. Ida Skinner, Mrs. Eva Walker Howard, Mrs. Emma Twitchell, Frank Goldsmith, local superintendent of the Burnham & Morrill Co. and others.

The after-dinner program was in charge of Geo. L. Skinner, who after words of welcome introduced the speakers and entertainers. Mr. Bernard of Portland, representing the Burnham & Morrill Co., brought the greetings of his concern and introduced Mr. Bradley, who cooked the beans.

Mr. Fortune, vice president of the Shawmut National Bank of Boston spoke along broad lines namely, the textiles, the shoe industry and New England's natural resources.

Herbert Tucker, chief of Annual Industry emphasized the dairy herd as a possibility for good returns, success depending upon the dairy cow, the equipment and the market. He suggested selling fluid milk in preference to handling cream for profits.

County agent Ridley of South Paris and Leslie E. McIntire of Waterford brought facts and figures along lines of dairy herds.

The addresses were interspersed by moving pictures, prepared by the Extension Service of the International Harvester Co., shown by Mr. Myers. Subjects were "Making of Good Cows" and "Milk, the Production of Cream and Butter."

A novelty was "Thirty Minutes of Magic" by Ernest A. Carter, the well known magician of Portland. His tricks were selected for the small space at his command and featured various feats of palming, using handkerchiefs, eggs and a lighted cigarette. The Hindoo rope trick was mystifying and the magic rings kept the crowd guessing. A line of humorous patter accompanied his work and kept the crowd in good humor.

Percy M. Walker of North Newry was on hand and greeted many acquaintances, but took no active part in the program.

That the field day has grown in popularity the past twenty-three years was vouched for by Prof. Herbert Tucker, who said he was present at the first gathering held in a shed with seventeen people present.

Verdict $100,000!
Daily papers testify that damages now awarded to people injured in automobile accidents are increasingly severe—so severe that motor car owners are increasing their own Public Liability Insurance.
The cost of additional protection against large verdicts is only a fraction of the amount you'd expect to pay.
Let us show you the figures on the low cost of adequate Public Liability Insurance.

Holiday Guests—Kiwanians Entertained—Callaghans Given Reception.

Rev. Arthur Callaghan preached a very fine sermon, last Sunday, taking for his text the words "The Christian Task." The choir sang two fine selections, "Come Let Us Sing" and "Something for Thee." The solo, "My Task" by Mrs. Frank Emery, was beautiful. The sermon, soloist and choir were at their best, and the worshippers who braved the inclement weather, felt well rewarded.

A number of students took advantage of Patriots' Day, returning to their respective homes for the week and their bright and sunny faces were good to see.

After the supper, a social entertainment was given: vocal solos by Mrs. Frank Emery and W. T. Norton; readings by Mrs. Randolph Churchill and Miss Irma Giles and a minuet danced very prettily by little Eleanor Shaw. Good music furnished by John Garner, saxaphone.

Monday evening, April 15th, the L. M. R. C. met with Mrs. Elizabeth Sawyer. Roll call answered by problems in Pan-Americanism; readings, current events, Mrs. W. M. Chellis. Refreshments served by hostess.

The afternoon of April 16th, Mrs. Jas. Chapman and Mrs. Sherman Stanley entertained the Ladies' Circle in the vestry. After the business meeting was over, a general good time was enjoyed, with readings, guessing contests and sociability, sweetened with delicious homemade candy.

Harold Jones and a friend of Peabody, Mass., were week end guests of Mr. and Mrs. Fred Merrifield.

Among the home seekers over the week end were Allen F. Garner of Lowell Tech, George Ridlon, Boston Tech, Eleanor Ridlon, Bradford Academy; Helen Pratt and Mildred Mitchell of Bates and Margaret Chellis of Durham University, New Hampshire.

Rev. and Mrs. Arthur A. Callaghan were given a reception in their own home on the evening of April 18th. It came to them in the light of a surprise party and as a visible token of the pleasure felt by their people at the return of their pastor and wife to dwell among them yet another year. The request for their return had been unanimous and thanks is due the Conference for acceding to their wishes. "May their days be long in the land which the Lord their God giveth them."

Extracts from History of Sweden

Growth of Town, Officers Who Served

On April 6th, 1813 was held the first town meeting after the incorporation of Suncook Plantation into the town of Sweden. The schoolhouse in school district No. 1, (formerly No. 5 of Lovell) served as the town house in the then lightly populated town. Captain Benjamin Webber, Andrew Woodbury and Col. Samuel Nevers were chosen to make a final settlement of all matters pending between the towns of Lovell and Sweden and Philo Holden was elected to take charge of the securities and other property belonging to the town.

At the settlement of the towns, John Whiting fell to Sweden as its share of the town paupers and was taken to board by Nathaniel Ordway at $1.18 per week. There were few highways in town and the expense of keeping them in repair was very light and labor was but poorly recompensed being per day for man $1.00, for one pair oxen $0.67, for plough $0.67 and for cart $0.25. Town meetings were warned by posting notice upon the school house as that was the most public place and was where nearly all of the town's scholars went to school.

Sweden in the Year 1829

Town meetings were held January 10th, April 6th., Sept. 14th. and 20th. In January Daniel Walker, Nahum Maxwell and their property were annexed to school district No. 1. Col. Samuel Nevers, Samuel Nevers, Jr. and Daniel Charles were elected members of the board of trustees to make the number up to serve and the report of the trustees was accepted. Deacon Nathan Holden and Daniel S. Stone and Aaron Holden, with their property were annexed to school district No. 1, April 6th. and decided there shall be another notice posted on No. 1 school house to warn town meetings, Sept. 14th. The selectmen, town treasurer and town clerk were authorized to grant a license to such persons as they saw fit under the restrictions of the law to sell Spiritous and mixed liquors, part of which was spiritous to be drunk in their store or shop.

License

Sept. 14th., 1829. This may certify that Andrew Woodbury has this day been licensed as an inn holder, victualer and retailer of all kinds of spiritous liquors by the selectmen, town treasurer and town clerk and that he paid the license money as the law required. Attest Francis Hamlin, town clerk.

FAMOUS AMERICAN DUELS

The above is the title of Don C. Seitz's last book. It is from the press of Thos. Y. Crowell Co., publishers, of New York. Price, $3.50.

The book will be a surprise to many. It portrays the fine art of taking human life to satisfy personal "honor" and perchance make way with a competitor. Dueling was handed down from the days of chivalry and flourished best in the South, though it spread to chilly New England and many other states.

Mr. Seitz tells the story of a dozen or more of the prominent ones. Men of national prominence and marked ability fell by it.

Maine lost a Congressman, Jonathan Cilley, in Washington, D. C., in 1838, who accepted a challenge from Wm. J. Graves of Kentucky. Vice President Aaron Burr shot and killed Alexander Hamilton in 1804. Andrew Jackson had a long and unsavory record of fights, broils and duels. The same is true of Senator Thomas H. Benton. In the navy, James Barron killed Stephen Decatur over a trifling feud. Even the saintly Henry Clay did not escape. Tom Marshall and James Watson Webb, the editor, fought in 1842, after stringent laws had been enacted to stop dueling. Webb was sentenced to two years in state's prison, but was pardoned by the Whig governor, Wm. H. Seward.

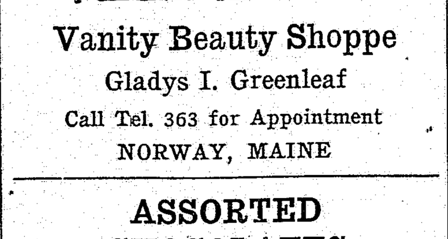

Thus the story goes. It is unbelievable in the present day, yet true. It was written, the author says, "To reward the curious and to make more accessible the strange chapters in American history."

"Tex" Cappy Smith has purchased a bicycle and put his car into discard. Tex says the change was made to dodge the gas tax and the new hitch-hiking law.

Mrs. Leslie Hobson of North Waterford was in, Wednesday, looking for a bundle containing some cloth, which she lost several days ago, after a shopping trip in town. It had not been found and brought to the office.

It seems that Norway has not even standing room for Mr. Trotsky.—North Penn. Reporter.

If it means Norway, Me., it is correct. There has been only one of that sort in town and he is now moved away.

Frank DeCosta: "I started to be a soldier in the dismal swamps of Chickamauga and became a Bath Veteran; later tax collector and postmaster at Norway, and then an insurance peddler. Were I younger, I'd take to aviation. In that there is a field where future and adventure lies."

John Woodman: "I've read all that is going on Farm Relief, but I'm unable to see the way out as yet. I could make money on a farm at the present market prices, but I'd have to work and so would Mother. Maybe Congress in its wisdom can fix up something that will ease the middle West farmers, but I doubt it."

Rep. Harold C. Perham of Paris is put on the "Legislative Roll of Honor" by the Portland Evening News. Mr. Perham should be returned to the 85th session in 1931 to finish the work commenced. A reasonable modification of the "Blue Laws" should be made. That bearing his name to us seems fair and reasonable.

The Sport Editor acknowledges passes and a program from William E. Dufresteau of Somerville, Mass. William, otherwise "Picture Bill" is manager of Vino's Broadway Theatre and had a grand opening program this week in honor of introducing the "talkies" at his house. We accept the tickets with pleasure, and wish the manager success along the whole line. Some day it may be possible to drop in on the movie magnate, just to show him my home wood pile is being sawed by the letter three quarters.

In a recent letter from C. R. Mills, the Fryeburg "Fliver Editor", says: "Fliver later. My heart is still with the 'Fliver,' but my body is submerged with signs, signs, signs, which persist in cluttering up our sanctuary, and at this season, submerging the 'press' altogether." We are glad the Fliver Editor has plenty of signs, for signs mean money, and money means a thousand and one things the heart desires. We know our readers will be pleased to read the Fliver items when the rush of signs is over. Jot down a line now and then as the days go by and you will have the Fliver in motion again.

Frank Millett of Mechanic Falls was in town, Saturday. He came in a big car loaded with folks, and had a driver. Mr. Millett is pretty near the whole thing at the Falls. He jauntily wears an empty coat sleeve pinned to a pocket and would easily pass for a World War veteran.

For less than a hundred years, Mr. Millett has "stormed the state", held office and did business with friends and enemies on the level.

Old age has not arrived, though he counts 85 winters. He said Ad Gammon, who was with him when he last called on the Wearies, was trying to win a bet from him. He wagered a dollar that "Ad" would outlive him (both are near the same age) and "Ad" was trying to win and had taken to his bed, when nothing ailed him except an imaginary tired feeling and the desire to win the money.

Up-in-Town correspondent speaks in the News and Critic (Laconia, N. H.) thusly:

"It's mighty queer why anyone will get things that he could do without, even ladies get trusted for wearing apparel and then spread like a peacock to show their fine clothes.

"Time was when women made their own clothes, and that too, when it took some cloth to make up a dress!

"Now, when dresess are made like a pillow slip, they have to buy them and pay a high price for them, when a yard or two of cloth suffices to make up a dress!

"I feel like saying as one old woman said about hoop skirts, "O Lord, when will they go out of style?"

"So we say, 'O Lord, hasten the day when the dear ladies will put on decent dresses and wear modest clothes as of yore, only not trails or hoop skirts!"

John has propounded a poser in Bible study. We refused to print it until he assured us he could give the correct answer to all of them, if no one else could. Here are the questions:

How many times is the word "Lord" found in the Holy Bible? Also the words "Jehovah" and "Reverend," and where is the latter found? Which is the middle verse of the Bible? Which is the longest verse of the Bible? Which is the shortest word of the Bible? In what Book and chapter are four verses alike in the Bible? In which Book and chapter in the Bible does each verse end alike? What two chapters in two different Books are alike? How many times does the word "girl" appear in the Bible and where? How many words, letters, verses, chapters and books in the Holy Bible? Which is the finest chapter to read? What verse contains all the letters of the alphabet except one, and which one does it not contain? How many times does the word "and" appear in the Bible?

Who can answer these correctly? We wait.

Dr. C. R. Aldrich, Brattleboro, Vt.: "Saw an article in the last Advertiser calling attention to mud in some of the Norway streets. Autos being stuck and pulled out.

"Why not have the tractor go up and down Main Street a couple of times during a busy forenoon, and thus prove the article referred to is true? I had the fortune to be in Norway town meeting day and see the tractor in action. It passed with great noise up and down Main Street until the road commissioners were elected and it retired to winter quarters. Its duties done.

"I'd suggest that instead of Norway's having three road commissioners that they have 3,000—if that number of people still live there—and allow them to work out their taxes late in the fall when there is nothing else to do. Their time cards could be O. K.'d by the other 2,999 commissioners.

"And again, to get the voters out at town meeting, let the sisters in short skirts and latest stockings parade up and down Main Street and keep the tractor silent. That would do it. The tractor could be kept off Main Street during the busy hours of that morning and allow someone to talk, listen, see, explain, reason and maybe vote intelligently on road building problems and the number of road commissioners who can best serve the town.

"I still believe you should have 3,000 and keep the tractor silent on the morn of March meeting."

Miss Bessie York, who worked for many years in the Blue Store, is stopping at George Emerson's. She recently got some cupboard shelf-paper and we guess they are all much mussed up in housecleaning. The paper costs 4 cents per yard.

The Houlton Times got out a commendable 12 paged auto special last week. The top line wisely said: "The Most Dangerous Phrase in the English Language is 'Step On It.'" The extra was not overloaded with advertising, but had enough to look well and probably pay expenses.

We have never seen a female basket ball team in action. The other night we sent a reliable reporter to tell us. Here is his report:

It was exceptionally good, and interesting, especially one particular and peculiar bright star during her activities in the course of the game:

1. Fixed her hair thirty-two times.
2. Attempted to stuff middy into bloomers 397 times.
3. Pulled up stockings 131 times.
4. Jumped up and down, waved her arms and screamed at short intervals.

Garfield Walker is responsible for this and tells of a man who was single thusly:

"He had everything to make him happy: a home with efficient servants. He could stay out as late as he chose, bring company home, without batting an eyelash. He could play golf all day Sunday without someone moaning, "You have made me a golf widow." He did not have to play bridge with the "erowd." His soul was his own. His life was his own. But something was lacking. He had no one to listen to his boasting, and so he got married."

A clipping found in an old book and refers to the campaign of 1884:

Some fine morn
His high horn

And sit down

Did you ever hear Shortie Cook talk? Now listen to him:

"Do you know the why and wherefore of the familiar barber pole? My many years of experience as a barber have aided me in research on this subject. Why is that garish, wooden peppermint-stick propped up in front of every barber shop? In the olden days the barber was more than a barber. He was a doctor, too. Years ago bloed-letting was thought to be a cure for any ailment. It is said that letting of blood hastened the death of the father of our country, George Washington. At any rate, it was the barber who did most of the blood-letting. Hence the red and white pole, representing a bloody, bandaged finger, was erected in front of the barber's shop."

Some years ago one of the Advertiser force was given to writing poetry. This was in the days when Jack, the airdale, was alive and in his prime, and held forth in the front office. Only two referred to in the poetry are here now.

Why do we all love Jackie so
And smile until we're tired?
Just when the Boss is round, you know?
Cause—maybe we'd get fired!

O, why does Jack love Ralphie so
In fair or stormy weather?
Cause Ralph and Jack are—well, you know.
They're "in the boat" together.

O, why does Jackie love Lee so,
With such unswerving trust?
'Cause Mr. Lee loves Jack, you know,
Because—he thinks he must!

O, why does Jack love Ernest so
And near him always hover?
'Cause Ernest talks like Jack, you know,
And seems almost a "Bruver."

O, why does Jack love Eben so?
'Tis very hard to say.
'Cause Eben always growls, you know,
"O, darn you, go away!"

O, why does Jack love Elsie so
And stand with lordly airs?
'Cause Elsie is so sweet you know,
He thinks she really cares.

O, why does Jack love Arthur so?
'Cause Arthur's voice rings true.
And then we all like him, you know,
Why shouldn't Jackie, too?

O, why does Jack love Bertha so
And wave his tail with joy?
'Cause Bertha pats his head, you know
And says, "Good Jackie boy."

O, why does Jack love Lorna so
And kiss her rosy cheek?
'Cause Lorna bravely stands, you know,
And *thinks*—but doesn't speak.

Fryeburg's Fire Department

How It Has Acquired Equipment and Become Efficient

The following description of the fire department was read by the Fryeburg fire chief, George Coleman at a recent Kiwanis meeting and shows in a clear, concise way just what is being accomplished under the leadership of Chief Coleman, who has had years of practical experience in the Boston Fire Department:

I have been requested or I might say urged to come here tonight and say a few words to you in relation to our fire department here in Fryeburg—What we have done and what we hope to do in the future. Our aim insofar as we can, is to make this department a modern fire department so that the people of this community may feel that they have a dependable organization to call on in time of need.

About two years ago the Corporation bought a combination hose and chemical truck and after a while a meeting was held at the corporation building to organize a department. Later I was called in and informed that I had been chosen as Chief and asked to accept the position and appoint members. I refused to accept, but after some persuasion and the promise of hearty co-operation, I agreed to take hold. I did so. After taking account of stock, I saw at once there was great need of many things. The first was the need of a set of ladders and a truck to haul them. The next was suitable quarters to house them.

At the next annual meeting of the Corporation, I asked for an appropriation to remodel the quarters so that two pieces of apparatus could be housed side by side. The request was granted and we now have a very satisfactory fire apparatus quarters. The next move on our program was to obtain a motor ladder truck with suitable equipment. We felt that it would be useless to ask the corporation to appropriate money enough to pay for a motor ladder truck, as it would cost four or five thousand dollars for such a piece of apparatus. So we decided to try our hand at building a truck and then get the ladders, as we could. We raised $100 among ourselves and got track of a second hand 8 cylinder Cunningham hearse that had been traded in with the Buick Company at Boston. We sent a mechanic there to look it over, who reported favorably on it and we bought it for $100. I then got our friend Mr. Hastings to draw up a suitable subscription paper to raise money to complete our objective. I might say at this point, that before this paper was thought of, we went with the Chemical up to Mr. Creighton's house and took care of a burning building on his property the night before the Fourth, and he was so well pleased with the job that he presented us with a check for $100, when he heard what we were trying to do and has since presented us with another $50. I circulated the paper among some of our summer visitors as well as our own citizens, with very good success, receiving contributions from $1 to $150, receiving in all somewhere about $700.

When the hearse arrived here we dismantled the body and had the chassis cut in two and an extension put in and the engine overhauled. I then went to Boston and to the Fire Department Maintenance Division to see if I could get hold of a good discontinued horse-drawn ladder truck, but was unsuccessful there. I got on the track of one at Billerica, Mass., I went out there, saw what they had and after some correspondence and dickering, I bought it delivered at the Depot here in Fryeburg for $150. I sold the wheels for $25. There was a complete set of Fire Department ladders from 14 ft. to 45 ft. with plaster hooks, axes, lanterns. We mounted it on the Cunningham chassis, had the whole thing painted and lettered, and we have a ladder truck powerful and efficient as if the Corporation had paid three or four thousand dollars for one, and when we turn it over to the Corporation, it will have cost them not one penny. So much for the past and present.

Now for the future. I want to say what we need and what we want is your co-operation to get the people interested in this vital municipal department. We want their support and co-operation, and we believe that our work merits the same. One of the most essential agencies where there is need of co-operation is the water department with the fire department. Without water, a fire department to utilize it, is of but little, if any, value, and the fire department under such conditions is practically helpless. Therefore the two should go hand in hand to bring about a proper development of their functions.

How many of us ever bestow ten, or even five, consecutive minutes thought on what the firemen and the fire department means to this or any other community until it is suddenly brought home to them by a fire in their own home. Altogether too large a percent of our citizens give no serious thought to the men who they are liable to have to call on for help when the element of fire suddenly enters their homes.

Our department consists of 25 men, divided into two companies. We give our services. We receive no pay. We respond when the call comes. It costs us time and money to do this, especially when we spoil some of our clothing at a fire, but we have a community interest and a strong desire to build up a department that this corporation will some day be proud of, but in order to do this we will need and we solicit your helpful co-operation. We need more two and one-half inch hose. At the present time, if we use what hose we have on the truck, we have not enough dry hose to replace the wet hose while the wet is drying.

HUNT'S CORNER AND VICINITY

Gentlemen's Day Observed—Springs Here for Holiday—Keniston Boy Injured.

Even the weather man seemed to favor gentlemen's day. While the roads are nothing to brag about, yet automobiles managed to reach the grange hall, Saturday April 20th. As to the dinner the brothers lived up to their reputation for sure those were good old fashioned beans with brown bread, pickles, horse radish, etc., as to the generous plates of fancy cakes and pies. We won't trp to enumerate them. Don't even need to say that the feast was a success in every way and especially enjoyed by the sisters who had no cares for the day, but returned to the hall for a restful hour while the brothers leisurely "did the dishes." Worthy Master Roy Wardwell called the meeting to order, after the usual business, the following program was given:

Opening Song, "As We Go Forth to Labor"...
Reading, "Smack In School"....A. A. Bruce
Music ..... Band
Reading, "Going Fishing"...Allen Cummings
Song, "Sonny Boy".....Hugh Little
Original Poem, "When the Sap Begins to Run"
..... Leon Kimball
Music ..... Band
Reading, "O. K. Otherwise"...Charles Morey
Song ..... Roy Wardwell
Reading for Irving Beckler by Celia Gammon
Grange Training Fits for Public Service....
Song .....Mr. Bull
Reading and a song.....Brother Wentworth

An interesting talk by Mr. Bull closed the program. A pleasant feature of the day was a complete surprise to sister Dora Beckler, brothers Roy Wardwell, Hugh Little and Leon Kimball, when two beautifully decorated birthday cakes made by sisters Celia Gorman, Ruth Allen, Lilla and Edith Stearns were presented to them. Then the fun of all blowing the candles out together, cutting and sharing the cake and the pleasure of having so many of our number, especially our older members, who have not been with us since the cold weather made us feel as our Worthy Master expressed it, like saying, "Blest Be the Tie that Binds." Oh! the contest! I had almost forgotten the judges were out only a short time. The verdict was a tie.

A number of the young men of the grange cut wood for Irving Beckler, one day, recently.

Harry Spring and friend from West Roxbury, spent the holiday and week-end at their place here.

Little Elwin Keniston met with quite an accident when he slipped and fell on the door step of the school house, hurting his face quite badly, so that he is still under a doctor's care.

But Socony always fits because it is made from paraffin crudes

MISFIT motor oils! Garage men know only too well what they are. Thousands and thousands of cars are badly damaged, perhaps ruined, by poor motor oils—oils that didn't fit.

But cars lubricated with Socony stay on the road. Socony *Parabase* Motor Oil *fits* the motor. Specially refined paraffin crudes give Socony all the good qualities of a real motor oil—in just the right degree.

Car owners have discovered this for themselves. For more Socony *Parabase* Motor Oil is bought by motorists of New York and New England than any other brand.

SEE A SOCONY DEALER TODAY

Have him drain off the old winter oil and flush the crankcase with Socony Flushing Oil. Then, when he has poured in fresh Socony *Parabase* Motor Oil, *just listen!* The smooth, silent operation of the moving parts means longer life for your car and a higher value when you come to trade it in.

BATES—WEST PARIS

Charles Samuel Marshall

A lifelong resident of the town of Paris passed away Wednesday noon, April 9, 1929, at his home on High Street, where he has lived for over fifty years. He was born July 23, 1849, the son of Samuel Deering and Esther Penley Marshall.

On December 29, 1873, he married Lilla Jane Jackson, who survives him. He leaves two daughters, Winniebelle Porter of Roslindale, Mass., and Eva Hill of West Paris, two grandchildren, Marian and Howard Hill, three sisters, Annie Zilpha Plummer of Norway Lake, Lizzie M. Adkins, of Livermore, and Nellie Barrows of Rye, N. H., one niece, Mrs. C. A. Stephens, and one nephew, Leslie M. Barrows.

He has been in failing health for many years, but has borne his infirmities with great fortitude. He always had a good word for everyone and was well known for his keen and witty savings and was always sorry for anyone in trouble. He loved his family and was always patient and kind. He had a very strong belief in the hereafter and anticipated meeting the loved ones gone before. He and his wife have been members of Paris Grange, No. 298, for many years and he had a high respect for the order.

He was a Republican in politics, a strong temperance man and one that kept the Sabbath Day holy, a loving husband and a wonderful father. He will be greatly missed in his community. He has gone but his clean, upright character will be an example to those left.

Funeral services were held at the home, Friday, at two o'clock, attended by Rev. C. H. Young. There were a great many beautiful flowers. Interment was at West Paris Cemetery.

A little more tired at close of day:
A little less anxious to have our way;
A little less ready to scold and blame,
A little more ready for a brother's name;
And a little more willing the journey's end,
When time and eternity meet and blend.

A little less care for bonds and gold,
A little more care for the child's soul;
A little more time to speak a word kind,
A little more love for all mankind;
A little more faithful to show the way
To the land of fadeless day.

A little more love for the friends of youth,
A little less zeal for established truth;
A little more charity in our views,
A little more willing for the days' news;
So we are folding our hands away
And passing in silence at close of day.

A little more inclined to sit and dream,
A little more zeal for things unseen,
A little heavier to those ahead,
With visions of those long loved and dead:
And so we are going to where we must go,
To a future we know not, but must know.

A little more laughter, a few more tears,
And we shall have told our increasing years;
This book is closed, and the prayers are said,
And we are a part of the countless dead.
Thrice happy, then, if some soul can say:
"I live because he has passed my way."

DOES YOUR ROOF LEAK?

CORRUGATED ROOFING IS TAKING THE PLACE OF ALL OTHER KINDS OF ROOFING.

One of the reasons why people are covering their buildings with corrugated roofing is because it can be laid over old shingles at about one-third the cost of putting on other roofing. The metal is put on with 2 1-2 inch galvanized nails which go through the old shingles into the boarding. Many buildings are boarded up and down the roof; some buildings also have wide cracks between the roof boards. This makes no difference as the sheets are two feet wide and can be nailed anywhere across the sheet, wherever the nails hold the best in the boarding underneath. It cannot tear orblow off. This is considered a satisfactory way of putting on metal, and the old shingles keep the heat inside the building and deaden the sound of rain. Anyone can lay this roofing. No staging is necessary; simply use a roof ladder and lay the sheets up and down the roof, and continue across the roof. There are no old shingles to clean up and dispose of.

TWO WORTHWHILE ADVANTAGES OF METAL ROOFING

It is fireproof and sparks from a chimney can do no damage. Fire inside a building cannot burn up through and damage other property. Consequently it takes a lower insurance rate.

No snow ever sticks to a metal roof. This saves a great deal of hard work shoveling off roofs in the winter. Also ice will not form on the edges and water will not back up and run down, thus spoiling paper and plastering.

METAL—A LIFETIME ROOF

Our roofing is a copper alloy steel, heavy weight, which has been proved without doubt to be very satisfactory. It is rust resisting and does not have to be painted; once put on, you never have to go onto the roof again.

The price is $6.00 per one hundred square feet delivered, which is no more than other good roof materials, and the labor cost is about one-third, so that when your roof is all on, it costs less money and is good for a lifetime. Give us the length of rafter and length of ridgepole and we can give you the exact cost of material landed on your place.

Wardwell and each took a quartette of ladies and drove off, only the wives of the two chauffeurs having any knowledge of their destination, the other ladies left to guess and wonder until they arrived at Eastland Hotel, Portland, where they had dinner and from there Mrs. Mann took the ladies to Keith's Theatre to spend the evening. Timely Spring Letter

By Dr. Wm. J. Long, Editor, Author, Nature Writer and Fisherman

In reply to a letter recently sent him from the Advertiser office. The doctor makes happy return as follows:

"It is good to have your friendly letter, and to know that you are as keen as any other young lad to be off trouting. If Ponce de Leon had been a fisherman, he need not have searched Florida, and found death, in his quest for the Fountain of Youth. Our old Brotherhood of the Rod can find that fountain on any trout stream.

"Yesterday I heard from Camp Greenleaf, which is still icebound and muffled in a heavy snowfall. That is no news to your Norway folk; but I find it hard to believe, since trees are in leaf here, and shrubbery a mass of glorious color, and the pheasants that have been feeding all winter at the Birds' Table in my back yard are now scattered in cover which hides their nests full of eggs. The last nest I found had fourteen eggs; and the hen, before she glided away at my approach, had piled them up in a pyramidshape,—three layers, and three eggs on the top. If you can tell me how she did it, you will solve a mystery.

"Lately I have solved another bird mystery, by the way—how a woodcock carries her young long distances to food or water. No, she does not carry them in her bill or between her legs, as all the books declare.

"Yes, thank you, my gear is all ready for spring fishing; and a newly varnished fly rod hangs in a corner of my office, or workshop, where it daily reproaches me for idleness. Over a month ago, when the first bluebird brought the call of spring, I made two sad mistakes. One was to invent a new streamer fly, from which I expect great rises. The other was to help outfit two friends here, who will presently go to Nova Scotia for their first seasalmon fishing. Salmon tackle is expensive, and as mine has not been used for twenty years, I thought it high time to give it an outing in a friend's hand. Of course, I put it in tip-top condition. Since I monkeyed with that new fly and that old salmon tackle, my work goes like Pharoah's chariots, which "drave heavily." The mistake was to get ready for fishing too soon, leaving me nothing to do but wait till the fish get ready.

"Speaking of salmon tackle, here's an odd thing: My favorite line was bought forty-odd years ago, and was used many seasons. Thinking that it had seen its best days and that I must buy a new line, I left it on the reel when I came back from my last salmon-fishing trip to Newfoundland; and it has been wound tight on the reel these twenty years past. Instead of throwing it away, as I expected to do when I took it from the reel, I gave it a rub with line dressing. It is now apparently as good and certainly as strong as ever, and will go with the old rod to Nova Scotia.

"So the next time I hear some youngster jeering at the oldtimer who thinks that we had better material and much better craftmanship fifty years ago, I shall tell him about that line. Then I shall ask him, please, to tell me where I can now buy a silk enamelled line that after twenty years' use and twenty more years of neglect will still be as good as ever.

"I am sorry to hear of changed conditions at Middledam, due to lowering the lakes. I had supposed that fishing would begin there two weeks earlier than at Moosehead. If the ice does not go out of the Rangeleys until the first of May, or thereabouts, and if we must then wait indefinitely for the lakes to fill, I think that I shall postpone by visit and try the fishing another spring, when conditions return to normal. Or we might well try it later this season, after the drive goes through the dam. My spring vacation will be none too long this year; and it may be more satisfactory to spend the whole of it at Moosehead, rather than idle away the half of it waiting at Middledam.

"However, I shall wait for another report before making a definite decision.

"Meanwhile, am I right in assuming that you will come to Camp Greenleaf after getting your first fishing elsewhere? I hope so, for I have already engaged a cabin, and a good part of my present fun is in looking ahead to fishing with you once more, and tapping your store of trout wisdom, and finding myself a boy again." —Stamford. Ct., 4-22-'29.

Note.—We expect to be at Sugar Island in June and hope to "show off" before the Doctor and learn his ways, see that new model canoe and listen and assist in the evening stories, around the open blaze in the Big Camp.

SALES MANAGER APPOINTED

Ernest E. Ward, of Harrison, has recently been appointed by the New England Metal Culvert Company as director of the sales department throughout the state. Sargent, for many years chief engineer of the State Highway Commission, is the vice president of the company and the contact man. Mr. Ward has had a long and successful experience in the selling of culverts and his appointment as State Sales manager comes as a well merited promotion. TURNER DEAD—BUILDINGS BURNED

Fire was discovered in the home of Elihu H. Turner of Hartford, Tuesday night at 11:30, which consumed the large set of buildings and the remains of Mr. Turner were found in the ruins. Mrs. Anna Merrill Welch of Lisbon Falls and two children, who were at the home at the time, escaped uninjured.

Investigation began at once and from the chain of circumstances, officers decided to retain Mrs. Welch and she was taken to the County Jail at South Paris to wait developments.

Heavy snow and high winds the past winter have wrecked all that remains of Capt. Ames' side wheel steamer, "The Pennesseewassee." The craft was built in 1890 and contributed its share to the amusement of lake cottagers during the so-called "roaring nineties." When business went flat some years ago, the steamer was hauled ashore near George Stephenson's boat building shop and made into two boathouses. Little remains but the framework on the shore, and a dilapidated paddle wheel by the side of the road leading to the wharfs.
